

FRONTEND ENGINEER JOB PROFILE

The frontend engineer must be motivated to combine the art of design with the art of programming. Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application. You will work with and as the UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

PERSONALITY REQUIREMENTS FOR THIS ROLE

- Confident ownership of all projects.
- Team player, but a highly organised individual who believes in accountability.
- Creative, analytical and the ability to take a lot of initiative.
- The ability to spot problems and fix them or offer a more accurate solution.
- Extremely high attention to detail.

- Ability to understand business requirements and translate them into meaningful products working from the end user's perspective.
- Possession of a down-to-earth, humble and understanding attitude.
- Ability to quickly adapt to organisational changes.

SKILL REQUIREMENTS FOR THIS ROLE

- Bachelor's Degree in Computer Science / Engineering or a significant professional experience is a plus but not necessary.
- An eye for catching and immersive user design.
- Extensive knowledge in the principles on UI Psychology & Accessibility.
- Strong aptitude for writing efficient code and delighting users with best in class UX.
- Proficient in HTTP, Web services and RESTFUL APIs.
- Experience testing, version control (Git) and build tools is a plus.
- Ownership of 2 – 3 real life front end projects as points of reference in order to gauge your skill level.
- Understanding of CSS pre-processors.
- Good understanding of HTML, CSS and advanced JavaScript frameworks preferably Angular or Vue.js.
- Basic knowledge of image authoring tools, to be able to crop, resize, or perform small adjustments on an image. Familiarity with tools such as Gimp or Photoshop is a plus.
- Familiarity in server side development is a plus but not required.

- Proficient knowledge in hybrid technologies such as Ionic and React Native.
- Working knowledge in using popular graphic editing tools is a big win.
